A Little About Me

In the name of God

I am a UI designer with commitment to crafting immersive digital experiences. With an over seven years experience, I have focused my expertise in creating intuitive user interfaces and elevating user experiences. My belief is that design transcends mere aesthetics; it's a powerful tool for enhancing functionality and usability.

My journey into the UI/UX design began with a background in computer engineering at Shahid Beheshti University, where I distinguished among the top 1% of national university entrance exam applicants. My multifaceted background empowers me to approach design with a unique blend of technical prowess and a discerning eye for aesthetics.

I have been privileged to collaborate with diverse and dynamic teams, enabling me to grasp their distinct needs and deliver holistic solutions aligned with overarching business goals. My focus has consistently been on the art of translating intricate technical concepts into user-friendly interfaces, thoughtfully catering to a wide spectrum of users. I perceive design as a holistic undertaking that extends beyond surface aesthetics, encompassing vital considerations such as usability, scalability, and the paramount goal of customer satisfaction.

My dedication to enhancing the customer experience has led to designing many different apps and websites for startup companies and marketing agencies.

My Carrier Experiences

Past

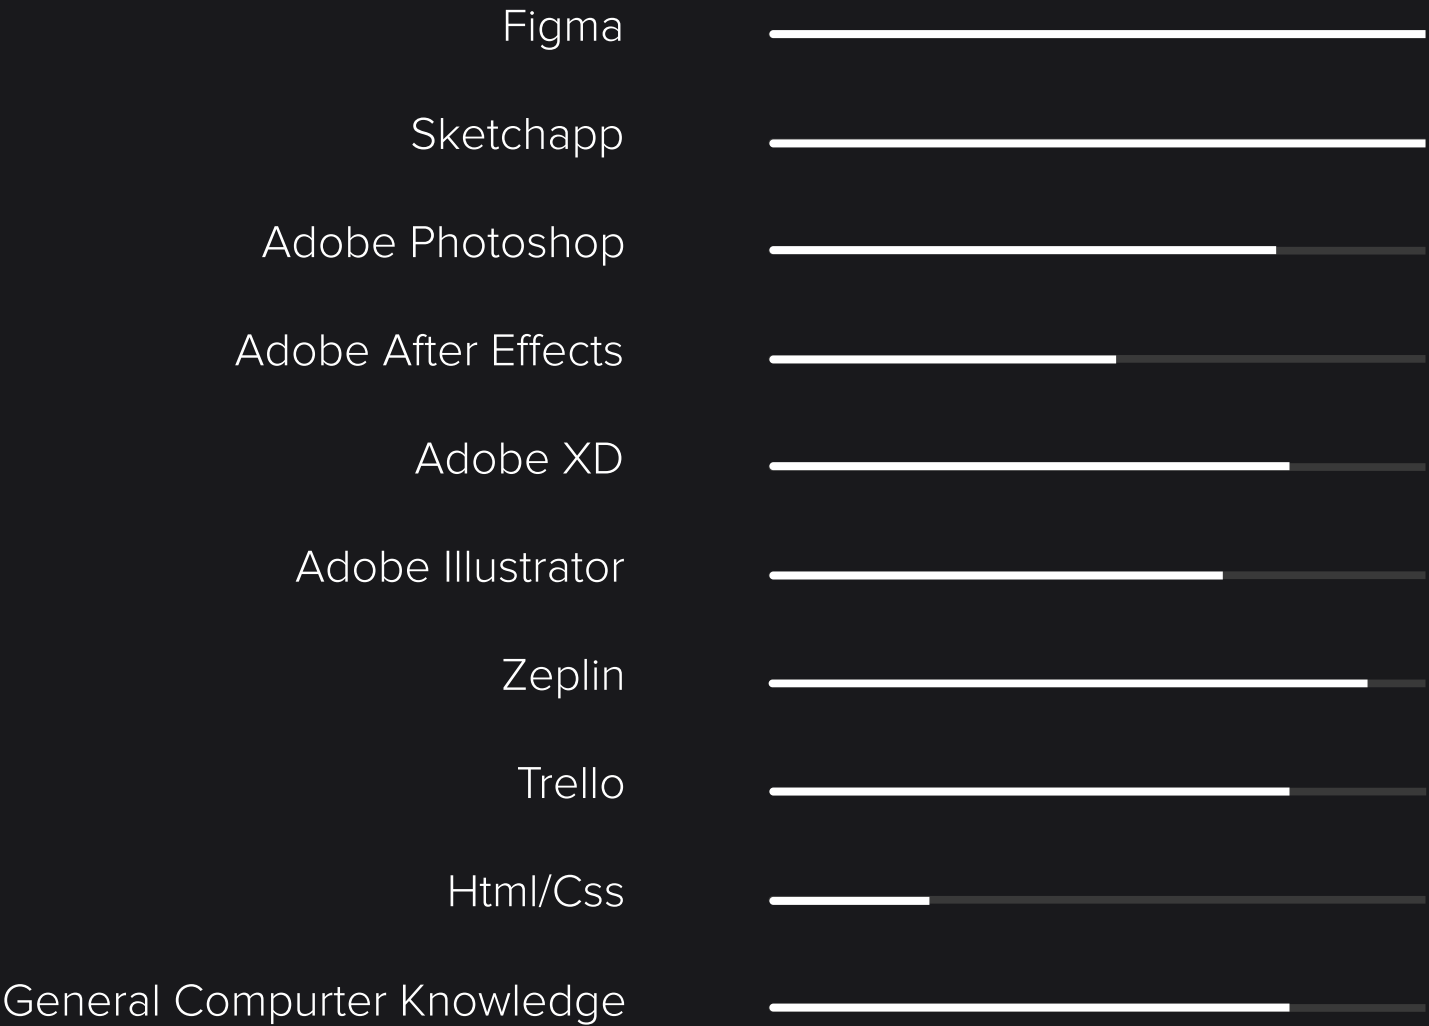

Embarking on my design journey in early 2016, I joined the startup **ATYNO** based in Tehran. Specializing in smart advertising through ibeacon technology, ATYNO provided a platform for my evolution from a WordPress admin to a designer. During this period, I crafted both printed materials and user interfaces for digital products. Simultaneously, I pursued a degree in industrial management at the university.

Post-ATYNO, I transitioned to a new chapter in my design career with **PARADIGM**, a design and branding agency. Working within tight deadlines across diverse categories, I contributed to various projects, including the design of an online grocery shopping app (Dayzi), a soccer app (Fotimo), a restaurant app (Fidilio), and more. This experience not only honed my design skills but also solidified my commitment to delivering impactful and innovative solutions.

Present

Since 2020, I have been a part of **ROSHAN**, a cutting-edge startup dedicated to machine learning and AI-based services, encompassing OCR, ASR, VRT, image processing, and more. Throughout this tenure, I have been actively involved in designing various apps and websites for our services, in addition to creating graphical and printed materials that enhance our brand presence.

Select Right Answer

1. I grab a notebook and start mapping out the brilliant idea I had in the shower this morning.
2. I looked at my to-do list and open the thing need to work on
3. I can't decide where to start
4. I spend half and hour looking at social media to see what's been going on.
